

Math Summer Assignment 2026-27

Entering 8th Grade

Dear Parents,

Please note that the summer assignments for Math have been posted on our website. We encourage all students to complete these activities over the summer to help maintain and strengthen their academic skills and begin the new school year and grade level with confidence and a strong foundation.

For students currently enrolled at Sagemont Prep. and using the IXL platform, the Summer Boost practices are available through the IXL website. Students will continue to have access to the platform throughout the summer and may log in using their current credentials. Students are expected to answer **5 questions correctly per day**, focusing on one skill daily. They are also encouraged to practice additional questions whenever possible. The link to complete these activities is as follows:

Rising 8th Grade

Math: <https://www.ixl.com/math/skill-plans/ixl-summer-boost-grade-8>

Rising 8th Grade Honors (Algebra I): <https://www.sagemont.com/wp-content/uploads/sites/20/2025/04/Incoming-Algebra-Student-Summer-Packet-1.pdf>

If students do not have access to the IXL platform, a PDF version of the same exercises is available on our website under the “Summer Assignments” section.

Please note that completion of the Summer Boost practice, whether in the form of a completed packet or done electronically on IXL website, will be valued at **30 points** towards the start of next school semester.
