

# The Sagemont School Pre-Professional Programs

The Sagemont School is proud to offer Pre-Professional Programs, wherein students focus on areas of study including Business, Science and Law. Spanning a diverse selection of classes and co-curricular activities, these programs will prepare Lions for college and beyond by providing specific insight and concrete experience in their chosen career paths or a path they think they would like to explore. The Sagemont Pre-Professional Programs typically conclude with students participating in an honors-weighted internship at institutions such as the Cleveland Clinic, YMCA, local law firms and dental clinics. Our students may also combine classes from Programs to create their own individualized Pre-Professional Curriculum.

## Programs and possible course offerings include:
