

To: Sagemont School students entering a precalculus course in August, 2020

From: The Sagemont School, Upper School, Math Department

## **Entering Precalculus Summer Packet**

The math department strongly recommends that all students-entering-calculus review foundational algebra/geometry skills throughout the Summer of 2020.

Please find attached an algebra/geometry review, found on the Internet, developed by Penncrest High School. You may find and use a different review if you prefer, such as a thorough SAT Math review.

Please save all of your handwork. In other words, when precalculus starts in August, your precalculus teacher does not want to see a list of answers with no work shown. Rather, your precalculus teacher wants to see your hand work for all not-easily-done-in-your-head problems.

If you have further questions, please e-mail Mr. Carlson at
